Subject: Proposal for COA Compliance Website

Hi Tony,

It was a pleasure speaking with you today! Following our discussion, I've put together a proposal for your project.

The COA Compliance Website is a custom WordPress solution designed specifically to help HOAs and COAs comply with new Florida laws. It includes essential tools for disclosing board meeting occurrences and outcomes, as well as a centralized document repository accessible to members.

You can check out a demo of our platform here: [Demo Link](#).

Your site will be fully tailored to your COA's requirements, incorporating your logos, images, and any other information to ensure it reflects your unique identity. Our approach not only addresses legal compliance but also enhances your association's image for all visitors.

Additionally, I'm including a year of complimentary managed WordPress hosting with this proposal. This package provides up to 10 email addresses and ensures that your site and its files are kept up to date.

The project will take up to 30 days to complete, provided we receive all necessary information and feedback from you. To get started, we require a 50% deposit, with the remaining 50% due upon project completion, before the site goes live.

Please feel free to reach out if you have any questions!

Best regards,
Rick Simnett
